

## **EOC Exception List Report**

FROM: Office of Data System Management

TO: Core Data, MOSIS Contacts

DATE: May 20, 2011

SUBJECT: EOC Exception List Report

The EOC Exception List Report available through the 2011 February Student Core Reports is currently not displaying the correct collection of students. It should report 12<sup>th</sup> grade students who were enrolled on the count date who have not taken one or more of the four required assessments. Instead it is showing students who were enrolled all year which may not display any students in the report. If you downloaded the report this week we would recommend waiting till next week when it is fixed to download again. We will send an update once we know it is correct. Thanks for your patience.
